

# MICROBEMAX™

## CONTINUOUS CLEANING SYSTEM

MICROBEMAX Continuous Cleaning System (CCS) is the all-natural way to clean and maintain drain lines. MICROBEMAX CCS delivers 96 treatments per day directly into your drain line. Each treatment contains millions of bacterial microbes that quickly eliminate fats, oils, grease (FOGs) and other organic materials that slow down drain flow or stop it completely. The CCS completely consumes fatty acids, eliminating FOGs and removing the opportunity for re-solidification. Not only is the Continuous Cleaning System highly effective and efficient, but because it works using natural bacteria instead of harsh bleaches, chemicals and enzymes, it is 100% green.

- Quick & easy installation.
- Eco-friendly microbial formula does not contain caustic chemicals, free enzymes, or grease emulsifiers, and does not cause pass-through.
- Metered dispenser delivers fresh bacteria every 15 minutes, 24/7 for 30 days.
- Contains multiple strains of bacteria that eat fats, oils, grease and other organic materials.
- Safe for all pipes, grease traps and sewers.

“ We used MicrobeMAX Continuous Cleaning System for our restaurant drains which constantly had to be serviced due to the large amounts of oils we use in our cooking. It also eliminated all of the fats, oils, greases and sugars in our other drains by the drink machines and behind the bar area.

Previously, we would call a service to come out every couple of months to hydro jet and augur our drains. It was expensive and would only temporarily solve the problem. Now we have been using MicrobeMAX, which comes in a small dispenser, and we have seen incredible results. The fly problem has been greatly reduced as well since they don't have the food source they once thrived on. MicrobeMAX is a great service and very convenient for us to use. The dispensers are so small, can mount anywhere and are virtually invisible.

I am happy to say all the fats and grease are no longer a problem in our restaurant and the savings have been great as well. I recommend MicrobeMAX for any business that has drain problems.
